PREFACE.

The purpose of this volume is to supply the great demand for a complete Choctaw definer. We have given the subject our undivided attention for many years, and when completed, submitted it to the best experts of the Choctaw Nation, who pronounce it as nearly perfect as the different idioms of the two languages will permit.

There has been no effort to make a literary display—the object being to make the English as simple as possible.

Very Respectfully,

THE AUTHOR.

THE PARTICLES,

These are the most difficult words in the language to arrange, understand, and define; a literal translation of them is not attempted. They are sometimes used when there is no corresponding word in English. They are generally used, and may be translated, as articles, pronouns, conjunctions and prepositions.

1st Articles, A, an, the. Second relatives, who, which, whom, that. Indefinite pronouns, some, some one, any, anyone. Double pronouns, he, who, she who, they who.

The following will exhibit some of the articles:

The Ak, hak, yak, amo; hamo, yamo: ash, hash, yash, ato, hato, yato, atok, hatok, yatok, atuk; hatuk, yatuk, okut, hokut, yokut, okuto, hokuto, yokuto, ut, hut, yut, uto, huto, yuto, ano, hano, yano, oka, hoka, yoka, okuno, hokuno, yokuno, a, ha, ya, ano, hano, yano, kak' kamo, kumo, kut, kuto, mak, mut, muto, ahamo. chash.

The particles, oke, hoke, yoke, are used after verbs. The particle shke, (pronounced skay), is suffixed to verbs, and to other words where the verb *to be* in English is understood.

NOTE.—The pronouns in Choctaw have no Third Person.
